

Projecting Your Presentation for In-Class and Remote Students

Classroom with AMX Panel Style 46 and Zoom

GETTING STARTED WITH CYNAP

Display Image on Projector

-  Choose **System On** on the Control Panel.

-  Select **Cynap** from the Projector menu.

-  Connect your laptop to Cynap.
ON WINDOWS:
 - Use the **Windows Key** and the **P Key** to access the Project Menu.

 - Choose **Connect to a wireless display**.
 - Select the Cynap for your room.**ON MACBOOK:**
 - Select the **Airplay** icon in your menu bar for available devices.

 - Select the Cynap for your room.
-  Enter the 4-digit code that appears at the top of the Cynap screen on your device. Your laptop will appear on the Cynap screen.

USING ZOOM WITH CYNAP

Launch Zoom on Cynap

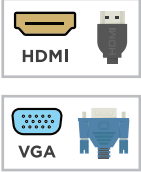

-  Select the **Mirror Mode** option on the Control Panel.
-  Tap the Cynap screen and select **[+]** button.

-  Choose **WebRTC**.

-  Log into your Zoom account by selecting **Create or Edit Account**. You will need to use Two-Factor Authentication each time you log in.
-  Select your scheduled meeting and choose **Start**.
-  Choose **Join from your browser**.
-  Select **Join Audio by your computer**.
-  Select **Start Video** to turn on the room camera.

Sharing Your Laptop

-  To show your laptop screen to both remote and in-class students, select **Share Screen** in the Zoom window.

-  Tap the menu at the bottom of your laptop screen and choose the **enlarge** button.

USING ZOOM WITHOUT CYNAP

Connecting With Your Laptop

-  Connect your laptop using an HDMI or VGA cable.

-  Tap the Control Panel and choose **System On**.
-  Select how your laptop is connected from the **Projector** menu.
-  Ensure your laptop display is not in Mirror Mode by unchecking **Mirror Displays** (Mac) or choosing **Extend Across Desktops** (PC).
-  Open the **Zoom** app on your laptop, then choose **Share Screen**. If you will be playing a video, check the box for **Share Computer Sound**.

 Share computer sound
-  Select which screen to share; this will normally be **Screen 2**. (If you don't see Screen 2, check to see if you're in Mirror Mode.) It is best to share the entire screen for easy navigation.
-  Select **Share**.

When finished, tap **Return to Main Screen** on the control panel and choose **System Off**.
